This course concerns the application of general psychological theories and principles to contemporary management problems. It will acquaint students with research in employee motivation, satisfaction, selection, training, evaluation, and teamwork as well as other topics in industrial and organisational psychology, including the role of the professional in organisations and in dealing with other professionals.

The course aims to provide psychology students with a general understanding of the field of organisational psychology. Students will

avoid it. All undergraduate students have to review the ELISE tutorial in their first semester and complete the quiz, b
