PHYS1160

INTRODUCTION TO ASTRONOMY

School of Physics

Faculty of Science

Term 1, 2022

Faculty of Science - Course Outline

1. Information about the course

Year of delivery	
Course Code	
Course name	
Academic unit	
Level of course	
Units of credit	
Session(s) offered	
Assumed knowledge, prerequisites or co- requisites	
Hours per week	

2. Staff Involved in the Course

Role	Name	Contact details	Consultation times	Queries

3. Course details

Course description				
Course aims				
Student learning outcomes	< < < <			
Graduate attributes developed in this course				
Graduate attributes	These learning outcomes have been associated with this graduate attribute:			
The skills involved in scholarly enquiry				
The capacity for analytical and critical thinking and for creative problem-solving				
The ability to engage in independent and reflective learning				
Information literacy: the skills to appropriately locate, evaluate and use relevant information				
Relationship to other courses within the program				

Syllabus	Module 1: Introduction
	<
	<
	<
	ζ.
	Module 2: The Solar System
	<
	٢
	<
	<
	Module 3: Life on Earth and in the Solar System
	< <
	<

Module 4: Stars and Stellar Systems <

4. Rationale and strategies underpinning the course

Teaching strategies		
Rationale for learning and		
teaching in this course		

6. Assessment tasks and feedback

Task	Knowledge & abilities assessed	Assessment criteria	% of a total	Date of		Feedback		
			mark	Release	Submission ²	WHO	WHEN	HOW

7. Additional resources and support

Textbooks	
Required readings	
Additional readings	Perspective The Cosmic
Recommended internet sites	

8. Required equipment, training and enabling skills

Equipment required	
Enabling skills training required to complete this course	

9. Course evaluation and d

11. Academic integrity, referencing and plagiarism
